

LIST OF SEEDS

New, rare and unusual varieties of shrubs, trees ect.
most of which are imported from collectors in other parts
of the world.

There are many difficulties envolved in locating, buying and
importing seeds. If you are interested in receiving new lists
please let us know.

PRICE PER PACKET OF SEED (Unless otherwise stated in list) is
.50¢ per packet. Minimum order of \$ 1.00

Seven Packets for \$ 3.00---- Twelve Packets for \$ 5.00

Payment in the form of check or money order should accompany order.
To be on the safe side , please do not send cash or stamps.
Please do not ask us to send C.O.D. As there are a few dishonest
people we have had to make this a rule.

CALIFORNIA Customers Please enclude 4% State Sales Tax.

All seed orders are forwarded via regular mail or parcel post pre-
paid, Via airmail please add 5¢ per packet additional.

SUBSTITUTIONS. We do not substitute unless you tell us that we may.
As our stock of the varieties of these seeds is very limited, we
appreciate your listing any substitute varieties that you may want.

SPECIAL GROWING INSTRUSTIONS are encluded in this list when they
are available. In some instances information regarding growing
procedure is not available.

Guarantee. We use the utmost caution in making our purchases and
buy only from collectors whom we beleive to be dependable and honest.
However we are frank in saying that there is a small chance of
mistakes in the indentification of some of the new and rare varieta ..
ies. we do our best to insure accuracy but we give no warranty,
express or implied as to the variety or productivity of any of these
seeds. Liability in all instances is limited to the purchase price
of the seed. If the purchaser does not accept the on these terms
they may be returned.

CAL. L. DAILEY,
Collector and importer of rare and unusual seeds
62 Shell Road
Mill Valley, California

Atalaya Hemiglauca. (Whitewood) A good Ornamental tree to 30 Ft. in height. Related to Citrus - bears oramental berries or fruit. Good for hot-dry areas.

Agonis Flexuosa Called the peppermint tree 20 to 30 Ft. with willow-like foliage with white flowers.

Anigozanthos Flavide. An Australian Sword Lily with red or mostly red wooley flowers - 1 1/4" long.

A. Manglesil. Flowers are about 3" long, red wooley at base and green beyond, the anthers not appendaged.

Alphitonia Excelsa. A find round headed tree for Mild areas. Flowers are cream colored - grows 30 to 40 Ft. in height.

Eoronia Megastigma. A very sweet scented flowering shrub. Requires sheltered, semi-shady position with plenty of moisture but well drained soil. A sandy loam is best, will not stand very cold or very hot winds. Unusual foliage. A challange to grow but worth while in mild areas.

(Cultural Notes.)

Before planting seeds of most Accacias and many Eucalyptus, they should be soaked in water at 140 to 150 degrees above zero. (F). This will soften the hard outer layer and quick germination will result. If your seeds have been planted without this hot water treatment and have not germinated within a reasonable time, hot water not over 170 degrees may be poured over the soil where they are planted.

Seeds of Eucalyptus Speciosa require the same treatment, otherwise they will not germinate. Many other hot climate shrubs, trees and plants require this heat treatment of the seeds to insure germinations. Be careful not to have the water too hot or you will cook the seeds and kill them.

CALLISTEMON. Australian Bottle-Shrubs. Very showy and decorative producing flower clusters that have the appearance of colored bottle brushes. Heights shown are natural growth. May be pruned after flowering to keep them lower and shapely. Hardy to 20 degrees above zero. (F) These will take hot weather with a minumum of water.

C. Lilacinus variety Carmina. This seed is from one of the late Mr. Edwin Ashbys hybrids. A lovely shrub with carmine flower spikes dusted with gold.- to 5 Ft. Plants from this seed will probably vary in height and color.

C. Lanceolatus.. This is a showy little tree, especially for warm dryer areas. Flowers are a brilliant crimson. to 8 Ft. in height.

C. Lineaus. A narrow leaved species with red flowers. - very hardy, 5 to 8 Ft.

C. Linearifolius.. A Calistemon rigidus. Robust species with large red brushes. Grows to 10 Ft.

C. Speciosus. A showy red flowering species with very large brushes.

C. Phoeniceus. A fire red species from Western Australia. Needs summer moisture and a moist situation to 8 Ft.

C. Violaceus. A tall dense growing shrub with violet flower spikes. Grows to 12 Ft. in height. Possibly a color variation of

C. rigidus. May vary from seed.

1. The following information is being furnished to you for your information only. It is not to be used for any other purpose.

1. The first of these is the fact that the Commission has not yet received any information from the Government of the United States regarding the results of its investigation of the activities of the American Friends Service Committee in the Philippines.

1. The first step is to identify the problem or question that needs to be answered. This involves understanding the context and the specific information required.

[illegible]

CALOTHAMNUS SANGUINIUS. The net-brush shrub. - somewhat similar to Callistemons but the flower spikes are like fish-net brushes and born along the stems instead of at the tips of the branches as the above. Blood-red flowers, unusual and attractive, grows to 6 or 8 Ft. in height.

Cassias. These Australian Shrubs have not been given the space they deserve in public and private gardens. All are hardy and decorative shrubs with yellow flowers. Prune after flowering period. Will stand heat and dry conditions. Soak seed in hot water.

Cassias. Compact and floriferous shrub, need a well drained position. Do not disturb the soil at the roots. Cut well back after flowering - 5 to 8 Ft. in height.

Cassia Bicapsularis. From the West Indies, also Australia. Ever-green shrub to 6 Ft.

Cassia Brewsteri. This is a 20 Ft. tree with yellow flowers, good for very dry areas.

Cassia Artemisioides. A very fine dwarf. Needs good drainage, withstands drought. 4 Ft.

Casuarinna. Australian Oaks. So called because of the similarity of the wood. Will grow where many of our native trees will not survive. Withstands very hot dry conditions. Leaves needle-like, very light and airy foliage, weeping habit. Flowers are short reddish spikes in late fall.

Casuarinna Glauca. A very ornamental tree to 40 Ft. needs 15 in. rain yearly.

C. Nana. A dwarf of Glauca.

Clanthus Speciosus. (sym. Formosus, damperii) Sturts Desert Pea. Tender half-trailing shrubs, 2 to 4 Ft. in height with sweet pea-like flowers from 2 to 4 in. in diameter, usually crimson or scarlet with a black-purple area in the center of the flower. Long-tap-rooted, does not like transplanting, but should be started in 6 in. long tubes of cardboard and set with the tubes into the ground where wanted. Soak seed one hour in water at 130 degrees F. before planting. Native to very hot dry country. Color variations occasionally show up when grown from seed, very beautiful and unusual.

CUPRESSUS SEMPERVIRENS. Pencil-like growth in deep green, with deep root systems these are able to endure hot, dry conditions. This tree is very useful for architectural and landscape effects of all kinds. Useful as tub plants, for porches and avenues. Evergreen conifer. 20 Ft. or more when mature but slow growing - very hardy.

EUCALYPTUS. We offer additional varieties of dwarf and unusual Eucalyptus below as well as ten additional varieties on the next page.

Euc. Cloezina. A new dwarf form with colored foliage, very ornamental. This is one of the best Dwarf Eucalyptus.

Euc. Ficifolia. The Famous red-flowering gum of western Australia. Does well in mild climates. For best results it should be grown with more than one stem. Varies from seed the flowers may be white, red, pink or cream. Grows to 20 Fts, usually lower.

Euc. Forrestiana 8 - 12 Ft. Yellow flowers, red pods - very fine for garden outline.

Euc. Macrocarpa. Coolgardie Rose. The largest flowered of all

Very descriptive seed pods. Should be grown as a malice with
than one stem. Needs good drainage and likes heat, large very
glaucous leaves. Grows to 8 or 10 ft. in height.

Calceolaria and Ranunculus. The Ranunculus is a small plant
with a single stem and a single leaf. The Calceolaria is a
small plant with a single stem and a single leaf. The Ranunculus
is a small plant with a single stem and a single leaf. The Calceolaria
is a small plant with a single stem and a single leaf.

leaf. The Calceolaria is a small plant with a single stem and a
single leaf. The Ranunculus is a small plant with a single stem
and a single leaf. The Calceolaria is a small plant with a single
stem and a single leaf. The Ranunculus is a small plant with a
single stem and a single leaf. The Calceolaria is a small plant
with a single stem and a single leaf.

Eucalyptus. Brilliant red flowers up to 5 in. across followed by very decorative seed pods. Should be grown as a mallee with more than one stem. Needs good drainage and likes heat, large very glaucous leaves. Grows to 8 or 10 ft. in height.

Euc. Erythrocorys. The Illyarris. A handsome small tree with large red buds followed by yellow flowers. From Western Australia. Grows to 15 or 20 ft.

Eucalyptus. Erythronema var. Lairdi. The dwarf form of the Lindsay Gum, beautiful and unusual flowers in red shades in spring - has very ornamental seed pods. 8 to 10 ft.

Euc. Grossa. One of the best dwarf Euc. large leaves, yellow flowers. Slow grower. 6 to 8 ft. in height.

Euc. Niphophi. The snow gum - a small crooked tree for exposed planting on uplands, or near sea coast.

Euc. Spathulata. A lovely very narrow-leaved tree. Good for damp places but will grow anywhere except in the northern states. 30 to 40 ft.

Euc. Blakelyi. A beautiful medium sized tree, useful for planting in damp water logged areas. It is exceptionally fine in bud and flower. Spreading growth to 30 - 40 ft. in height.

Euc. Gardnerii. Good tree for slopes. Ornamental or forestry purposes. 20 to 30 ft. Yellow flowers in the spring.

Euc. Megacornuta. A new ornamental species from Western Australia. Bronze-green flowers. 30 ft. in height.

Euc. Aloegrame. We have the seed but so far have no description.

Euc. Diversifolia. A small tree to 25 ft. in height. The leaves of which vary in shape or form. Unusual and ornamental.

Pittosporum Undulatum. Unrivalled as a small shade tree or tall hedge. Will stand some frost. Scented flowers followed by orange colored berries. Easy from seed.

Ochna Miltifolia. A West African shrub, 3-6 ft. yellow flowers in spring, the calyx turning red in summer enclosing 4 green berries which turn black in beautiful contrast to the red calyx. Needs a warm location, mild temperature.

Poinciana Gilliesii. The Bird of Paradise or Flamboyant tree. A small tree to 6 ft. covered with scarlet and yellow flowers, will not stand heavy frosts. Native to India. Hardy in some Southern states, very showy and conspicuous. Large seed, - fast growing.

Stenocarpus Sinnatus. A fine tree to 30 ft. Needs plenty of summer moisture. Bears large bright red flowers rayed like the spokes of a wheel. Called the Fire-Wheel tree. From semi-tropical Australia and needs mild climate.

Spathada Campanulata. The African tulip tree 20-30 ft. A beautiful flowering tree of the tropical area. Curved buds are brilliant green, followed by large trumpets of orange scarlet, 5 in across, the irregular fringed mouth are margined with yellow. Large pinnate leaves. Flowers on top of tree. Tender.

Thuya Orientalis. Oriental Cypress - from China and Korea. Known as the broad leaved Cypress. Makes a beautiful small tree to 20-25 ft. Evergreen and very hardy.

Euc. Lehmanni. 15 to 25 ft. A small bushy rapid-growing tree with a broad spread, very useful for low windbreak or shade purposes. Blooms are in large showy bunches followed by pointed seed-pods which are fused into a very attractive yellowish mass.

Euc. Preissiana. One of the best flowering gums from Western Australia. Large golden-yellow flowers followed by ornamental seed pods. 8 to 10 ft. in height.

Euc. Pyriformis. (red) small tree 8 to 15 Ft. has individual flowers, red in numbers of three tipped with white.

Euc. Torquata. The Coral Gum. A lovely little tree with orange or red flowers. Will flower at two or three years of age. May be grown in large pots or tubs. Hardy. Varies in height but may grow up to 12 Ft. - A beautiful thing in flower.

HIBISCUS TILIACUS. An evergreen shrub for mild areas, large yellow flowers. 15 Ft.

HAKEA LAURIN. The Pincushion tree of Western Australia. A Very attractive small tree 10 to 15 Ft. in height - covered with crimson and cream flowers in early spring. Will stand heat and drought, needs good drainage.

Grevillea Robusta. 50 to 100 Ft. Orange flowers fern-like foliage Makes a good pot plant for indoors.

Jacaranda Mimosaefolia. .. beautiful evergreen tree with fine feathery foliage for Mild areas covered with masses of blue tecoma-shaped flowers in summer. Plants are tender while young, will stand light frosts when established and well grown. 20 Ft.

Leptospermum Citratum. The Lemon scented TREE of New South Wales and Queensland. A dense growing tree up to 25 Ft. with 1 to 2 inch leaves strongly scented, easy from seed - need mild areas as it is fairly tender.

MELALEUCUS. Called the honey myrtles or paper-bark tea trees.

These are very decorative shrubs for warm temperate regions. They are drought resistant. Will stand hard pruning and better for it. Evergreen.

Mel. Elliptica. With large carmine bottle-brush like flowers to 3 inches long. Leaves with grayish hue. 10 Ft. - likes sandy soils

Mel. Wilsonii. With purple flowers borne along the stems 4 to 6 Ft. in height.

Mel. Hypericifolia. One of the best. Red flowers along the stems. 6 or 10 Ft.

Mel. Crassifolia. A free flowering variety with small Mauve colored brushes. to 5 Ft.

Mel. Ericifolia. A fast growing form with white flowers, will stand hard conditions and high winds. Will also grow in wet places.

Grows to 12 Ft. but easily kept lower by pruning. Native to Southern Victoria in Australia; it will stand more cold than others.

MELIA AZEDARACH. 25 to 100 Ft. height Called "pride of India" has sprays of orange, yellow berries remain all winter. Easily raised from seeds. (Note are poisonous to pigs.)

STENOCARPUS SINNATUS. A fine tree to 30 FT. Needs plenty of summer moisture. Bears large bright red flowers rayed like the spokes of a wheel. Called the FIRE-WHEEL tree. From Semi-tropical Australia. Needs mild climate.

SPARTOTHAMNUS JUNCUS. A small Australian shrub with masses of orange-red berries in autumn. to 2 Ft. in height.

GREVILLAE BANKSII. Sum. G. Fosterii. The white spider flower. 8 to 10 Ft. shrubs. not frost hardy, needs moisture during summer. Large spider-like flowers in White or red shades. Varies from seed.

PHYSALIS PERUVIANA. Easily grown in warm climate- treatment like tomatoes- fast growing annual which bears berries or fruits $\frac{1}{2}$ to $\frac{3}{4}$ inches in dia, all pulp- makes the worlds best flavored jam or tarts.

STAGHORN AND ELKHORN FERNS. We have a few plants of these rare ferns which grow like orchids on the sides of trees. If you are interested please write for description etc.-Not recommended for home culture.

We also offer a large number of varieties of Calif. Fushias. If you are interested in these, please write for our free list.

Enc. Pyroloma. (red) Small tree to 10 ft. in height.
flowers, red in number of branches and leaves.
Enc. Pyroloma. The bark is a brownish grey.
flowers, all flowers are small, white, and
grow in large pods or small, brown, and
up to 12 ft. - A beautiful tree in flower.
